

Bootstrap

Prof. Manan Thakkar

Why use Bootstrap?

- Open Source
- It is very easy to use. Anybody having basic knowledge of HTML and CSS can use Bootstrap.
- It facilitates users to develop a responsive website.
- It is compatible on most of browsers like Chrome, Firefox, Internet Explorer, Safari and Opera etc.

Bootstrap Package

- **Scaffolding** – Bootstrap provides a basic structure with Grid System, link styles, and background.
- **CSS** – Bootstrap comes with the feature of global CSS settings, fundamental HTML elements styled and enhanced with extensible classes, and an advanced grid system.
- **Components** – Bootstrap contains many reusable components built - dropdowns, navigation, alerts, pop-overs, and much more.

Bootstrap Package

- **JavaScript Plugins** – Bootstrap contains over a dozen custom jQuery plugins. You can easily include them all, or one by one. This is covered in details in the section Bootstrap Plugins.
- **Customize** – You can customize Bootstrap's components, LESS variables, and jQuery plugins to get your very own version.
