# Bootstrap

Prof. Manan Thakkar

# Bootstrap List Group

- The list groups are very useful and flexible component for displaying lists of elements in a beautiful manner.

- In most basic form a list group is simply an Unordered List with the class .list-group whereas, the list items having the class .list-group-item.

- To get a basic list group −

  1. Add the class .list-group to element <ul>

  2. Add class .list-group-item to <li>

# Bootstrap List Group

**Syntax - Example:**

```html
<ul class = "list-group">
   <li class = "list-group-item"> Computer </li>
   <li class = "list-group-item"> I.T. </li>
   <li class = "list-group-item"> CE-AI </li>
   <li class = "list-group-item"> HTML </li>
   <li class = "list-group-item"> CSS </li>
</ul>
```

# Bootstrap List Group with Badges

- We can add the badges component to any list group item and it will automatically be positioned on the right.

- Add &lt;span class = "badge"&gt; within the &lt;li&gt; element.

# Bootstrap List Group with Badges

- Example:

```
<ul class="list-group">
    <li class="list-group-item">HTML
    <span class="badge">12</span></li>
    <li class="list-group-itemitem">Deleted
        <span class="badge">5</span></li>
    <li class="list-group-item">Warnings
        <span class="badge">3</span></li>
</ul>
```

| New | 12 |
|-----|----|
| Deleted | 5 |
| Warnings | 3 |

# Bootstrap List Group – Active State

- Use the .active class to highlight the current item

```
<div class="list-group">
  <a href="#" class="list-group-item active">First item</a>
  <a href="#" class="list-group-item">Second item</a>
  <a href="#" class="list-group-item">Third item</a>
</div>
```
